

## Implement a Program on Single Inheritance

1)

```
class example extends SingleInherit{  
    int bonus=10000;  
  
    public static void main(String args[])  
    {  
        example a=new example();  
        System.out.println("Salary :"+a.bonus);  
        System.out.println("bonus :"+a.salary);  
    }  
}  
  
class SingleInherit{  
    float salary=40000;  
}
```

```
