Implement a Program on Packages.

1)

```java
package pack2;

public class A
{
    public static void msg()
    {
        System.out.println("Welcome to Package!!");
    }

}
```

```java
package mypack;
import pack2.*;

class B
{
    public static void main(String args[])
```
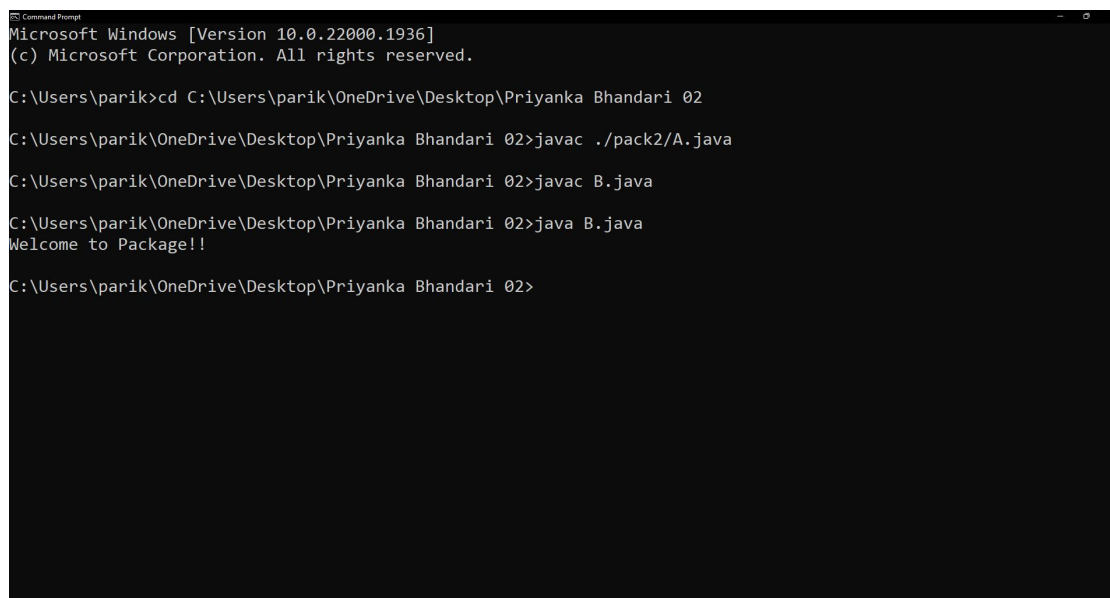

```
        {

        A obj=new A();

        obj.msg();

        }

}
```

```
Command Prompt                                                                                    –  □  ×
